

WINMAN SOLENOID VALVES

WVT0.S10 Valve Series

SAE Cartridge - 350 bar NC Single Lock Pilot Operated - Poppet Type

Description

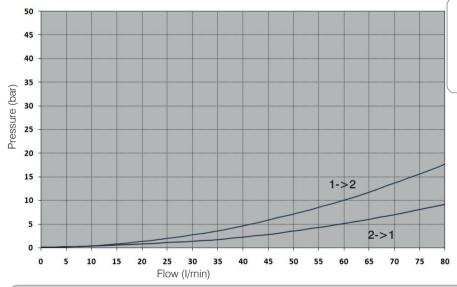

Solenoid operated, 2-way 2-positions, normally closed, piloted poppet type, screw-in cartridge valve. Typically used as a blocking or load holding device for high pressure circuits. When the coil is de-energized, the SVT0.S10 acts as check valve allowing free flow from 1 to 2, while blocking from 2 to 1. When the coil is energized the poppet lifts and opens both the 2 to 1 and the 1 to 2 flow paths. The rigid design using a 1-piece body contributes to minimize the effect of eccentricities in cavity and provides great reliability. Low pressure drop thanks to optimized flow path.

Technical Features

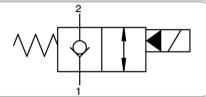

All external surfaces are zinc plated and corrosion-proof.
All valve parts are made of high strength steel. Poppet is hardened and ground to ensure minimal wear and extended service life.
Coil seals protect the solenoid system.
Manual override options.

Industry SAE common cavity.

Technical Data

Maximum operating pressure: 350 bar

Maximum flow: 80 I/min

Internal leakage: max 5 drops/min @ 350 bar

Response time: Energized 30 ms, De-energized 50 ms (typical 24V DC coil)

Temperature: -30°C to 110°C

Fluids: Mineral-based or synthetics with lubricating properties at viscosities of 7.4 to 420 cSt

Minimum pull-in voltage: 85% of nominal

Orientation: no restrictions Installation torque: 55-65 Nm

Seal kit code: SK.032 and SK.027 (coil)

Weight: 0.139 kg

NOTE: The performance chart illustrates flow handling capacity in both directions

(1 to 2 and 2 to 1, both energized).

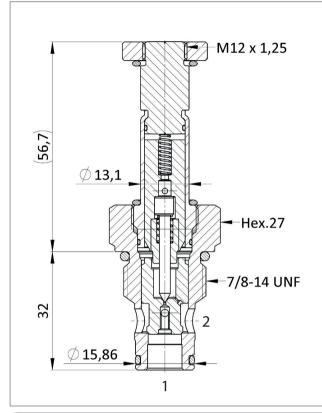

P/Q curves are recorded at TOil = 40°C and 46 cSt
